ORDR

FROM INACCURATE TO RELIABLE ASSET INVENTORY

Turn your CMDB into a true system of record;
ORDR + servicenow
deliver complete, accurate, and actionable asset intelligence that's always current.

WITHOUT ORDR	➤ WITH ORDR
INCOMPLETE VISIBILITY **75%** of CMDB deployments fail because they can't handle modern, complex, and dynamic environments.	**COMPLETE COVERAGE** **100%** of IT, IoT, BMS, and IoMT devices discovered and classified automatically.
MANUAL UPDATES **60%** of CMDB data is stale within 30 days.	**REAL-TIME SYNC** Continuous reconciliation eliminates duplicates and stale entries.
SHALLOW DATA Limited fields like MAC and IP address; limited or incomplete context.	**DEEP CONTEXT** Device type, make/model, OS, installed software, network flows, owner, and location captured.
UNMANAGED RISK Blind spots and stale data leave gaps attackers exploit.	**TRUSTED SECURITY POSTURE** Exposures surfaced, prioritized, and addressed in real time.

Gartner estimates **ONLY 25%** of organizations are receiving meaningful value from their CMDB investments.
