

SEGMENTATION HAS PROVEN DIFFICULT TO IMPLEMENT HISTORICALLY

From device discovery to AI-powered enforcement, ORDR delivers what others can't — segmentation without complexity, uncertainty, or added vendors.

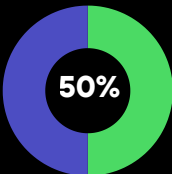

65%

**of organizations
believe they have too
many security tools**

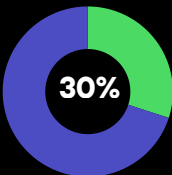

Barracuda 2025

A global survey of 1,000 IT security leaders revealed incomplete segmentation projects are leaving organizations exposed to lateral movement and incomplete Zero Trust policies.

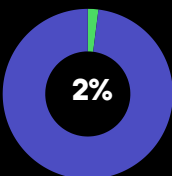

Vanson Bourne

**completed segmentation
of only 1 of 6 mission-
critical areas**

**completed segmentation
of 2+ mission-critical
areas of 6**

**completed segmentation
of all 6 mission-critical
areas**

ORDR gives you the visibility and control to protect your six most crucial areas — applications, data, servers, endpoints, domain controllers, and public-facing systems — so nothing is left exposed.

One platform. Total protection with ORDR.
