

From Complex Queries to Clear Answers: Supercharging HTM with ORDR AI

Ask in plain English. Automate the busywork.
Accurate inventories, instant insights — far less
manual reconciliation.

Plain English Queries

Ask in natural language —
“Show me ventilators overdue
for PM” — and get instant,
actionable summaries. No
platform training required.

90%

of HTM leaders say
automation is critical to
manage device growth
and compliance

(HIMSS)

25%

of hospital devices
are invisible to
HTM teams

(Frost & Sullivan)

Accurate Inventory

Discover every connected
device and keep records
continuously updated — no
blind spots, no manual
reconciliations.

Deep Device Context

Beyond make/model/serial,
ORDR AI enriches records with
OS, firmware, usage, and
location so CMMS data stays
complete and reliable.

30%

of CMMS records are
incomplete or
inaccurate

(AAMI/Becker's)

59

full-time equivalents
(FTEs) dedicated to
regulatory compliance
for average-sized
community hospital.

(AHA)

Compliance-Ready

Real-time, audit-ready
inventories make Joint
Commission and FDA
compliance simpler and
less resource-intensive.

ORDR AI
Empowers HTM to Work
smarter, not harder.
