university

When you consider network security, visibility, and inventory control initiatives, the protection of your business is at stake, which is why companies depend on the Ordr platform to discover and secure every connected asset. As is the case with any advanced technology, the path to success depends on ensuring that the team responsible for managing and operating your connected system has the proper training, skills, and expertise. Training from the Ordr University significantly increases the knowledge and ability of Healthcare Technology Managers, networking teams, and cybersecurity practitioners quickly, conveniently, and with minimal investment.

Organizations that are prepared with the knowledge of important product capabilities and best practices for configuration, operation, and monitoring will make better decisions up front. The result will be a more complete, accurate, and trouble-free deployment. Companies that are equipped with best practices for managing and supporting their Ordr-enabled production environment can minimize disruption and maximize the visibility and protection of their business.

### Expertise Brought to Your Team

To maximize the value of your investment, you must fully understand the important and advanced capabilities specific to the Ordr Solution. The training from Ordr U complements industry knowledge and experience, enabling you to maximize visibility, business protection, and attain the value you expect.

Courses from Ordr U deliver the foundation of knowledge and expertise necessary to effectively manage the Ordr-enabled environment and ensure your business is secure from dangerous threats. Our accreditation and certification options establish a benchmark for personnel, providing additional assurance that they are prepared to operate and manage utilizing the added visibility provided by the Ordr solution.

### Authorized Training Partners

We have built an ecosystem of qualified partners who demonstrate instructional delivery capabilities and technical expertise. Our partner community has global reach combined with local-market specializations to ensure every learner receives a quality experience. By participating in the program, partners receive access to our team of Education Services subject matter experts and a variety of assets designed to aid in the delivery of services.

### Convenient Delivery Options

Training is delivered in convenient ways to make participation easy. Courses are available in several different environments, providing the means for local, remote, and electronic learning around the world.

**On-Demand Training:** Ordr University contains a library of digital learning coursework that includes personalized learning paths for beginner to advanced learners. Courses include engaging video components and integrated knowledge checks allowing students to study the material at their own pace and take quizzes to check their understanding of the material.

**Instructor-Led Training:** Ordr University offers private online classes as an alternative to traditional classroom instruction. Virtual classes provide the same live lecture and hands-on lab learning experience, without the travel time, expense, and complexity associated with classroom training.

Ordr On-site courses deliver in-person, instructor-led lectures and labs without requiring students to travel to an Ordr training center. Courses can be tailored for specific customer requirements to provide the most relevant learning experience.

Both online and on-site courses use Ordr Education Services pre-built lab environment.

## Structured Learning Paths

Ordr University courses are aligned in structured learning paths specific to the needs of individual learners. Ordr Learning Paths:

- Ensure the learner is presented with topics and lessons related directly to their role in the enterprise.
- Included Digital Learning courses laid out in a logic sequence to ensure foundational skills are achieved before moving on to more complex topics.
- Feature progress checks to confirm understanding of the topics presented.
- Will expand as new features are released and new learning content is developed.

**Ordr Foundations:** The Ordr Foundations learning path ensures the learner has the ability to navigate the CSE User Interface, configure basic administrative settings, generate reports, and effectively administer their Ordr-enabled environment. This course series serves as the starting point for all Ordr role-specific learning paths

**Healthcare Technology Management: (Coming in 2024)** Designed for the specific needs of Healthcare Technology Managers, this learning path focuses on IoMT device inventory, utilization, and location tracking. It gives the HTM professional the skills needed to take full advantage of the Ordr “Clinical Defender” UI.

**Networking: (Coming in 2024)** This Learning Path is designed specifically for the needs of Network Managers and the NOC team. In this path the learner will use Ordr to analyze connectivity in their production environment including device groupings, subnets, and VLANs. The Ordr UI components specific to testing connectivity and monitoring traffic patterns are featured in this track.

**Security: (coming in 2024)** This Learning Path is designed specifically for the needs of cyber-security professionals. In this path the learner will tune their order enabled environment to identify and respond to internal and external suspicious traffic, assess security risks, pinpoint indicators of compromise, and stay abreast of the latest security threats to the enterprise

## Certification

Ordr Certification validates the knowledge, skills, and abilities you gain while working through the Order University Learning Paths. Certifications are earned by completing learning path training and passing path-specific exams.

### New User Onboarding (Learning Path)

- 22x Videos 6.5 Hours Total
- Self Guided & Sequenced
- Embedded Knowledge Checks
- Cumulative 83% for Cert of Completion

Ordr Onboarding Certificate of Completion

### Ordr Foundations (Videos)

- 10x Videos 2.5 Hours Total
- Self Guided (NOT Sequenced)
- Ordr Foundations ILT (Supplement)

Foundations Exam  
• Multiple-choice  
• LMS Hosted  
• CUS, EMP, PAR

Foundations Certification
